GLOBAL HAND HYGIENE DAY

5th MAY 2020

HANDS UP!

*Have you washed or sanitised
your hands?*

DID YOU KNOW: 62% of people fail to rub hands, palms and between fingers when washing hands!

Global Hand Hygiene Day was established by the World Health Organisation (WHO) to spread awareness of the importance of hand hygiene to help prevent the spread of germs and to 'bring people together' in support of hand hygiene improvement globally. Help keep your community safe and spread the word - Hands, Hygiene, Health!

Need Hand Sanitising Units? Visit sanistation.co or get in touch at sales@sanistation.co.
